THE INFORMATION COMPANY
THAT DELIVERS!

ABOUT OUR COMPANY

The management team behind Vehicle Data was the first in The Middle East to provide expert car valuation services. When you enlist the services of Vehicle Data, you get the expertise and experience of people who know the industry inside out.

The original Car Valuation was established in 2000.

The mission was simple: To provide reliable car valuations and specifications to the people and companies of the Arab Emirates.

Now times are changing rapidly we are updating our systems using Artificial Intelligence and Machine Learning techniques to further support our inhouse and outbound valuation experts.

We still strive to deliver this original mission statement — more than 20 years after it was first created. We take enormous pride in giving people access to accurate car valuations. And we're equally passionate about customer service.

ACCURATE PRICING OF TPL POLICIES.

Car Valuation's VIN-decoder can provide you with a vehicle's year, make, model, trim, and modifications quickly and efficiently. You can then use this information to calculate the ideal price for TPL policies.

ACCURATE COMPREHENSIVE POLICY PRICING.

Avoid under-insuring vehicles with a combination of Car Valuation's VIN-decoder technology and an extensive database of vehicle details.

AVOID FRAUDULANT CLAIMS.

Our VIN-decoder and proprietary database can check the history, VIN number and specifications of a vehicle in seconds. Car Valuation's technology helps you to identify suspiciously over-insured cars .a

Vehilcedata.ae and CarReport are part of

CEO STATEMENT

As first in the Region we introduced Car Valuation already in 2009!

Now we are back with a the best valuation product ever! eData is the first company combing Artificial Intelligence and Machine Learning to support its valuation team with the best possible data.

This is never been seen in the Middle Easty and ensurs all our customers to get the best possible data and most accurate values.

Car Valuation, we are passionate about providing accurate and reliable vehicle valuations services you can rely on. We utilize Big Data with various machine learning techniques to accurately value cars for finance and insurance companies. Thanks to our expertise and tireless research, we offer one of the most sophisticated car valuation services in the GCC.

We start all our client relationships by getting to know the business we're helping. Once we have a full understanding

of your business's goals and strategic requirements, we'll create a bespoke solution that helps you to make decisions with confidence.

Whether you need to accurately price a car insurance policy or issue finance for a vehicle, we can help. We also provide car valuation services for companies who need to buy and sell cars.

We have developed longstanding relationships with companies in many sectors. Our clients include OEMs, distributors, finance providers, insurance providers, and government agencies.

PERSONALIZED PREMIUMS AND LOWER CLAIMS

Have the system check for bulk Vin "Chassis" at once to assist in underwriting fleets with much lesser time in checking history and confirm the LR provided from the insured.

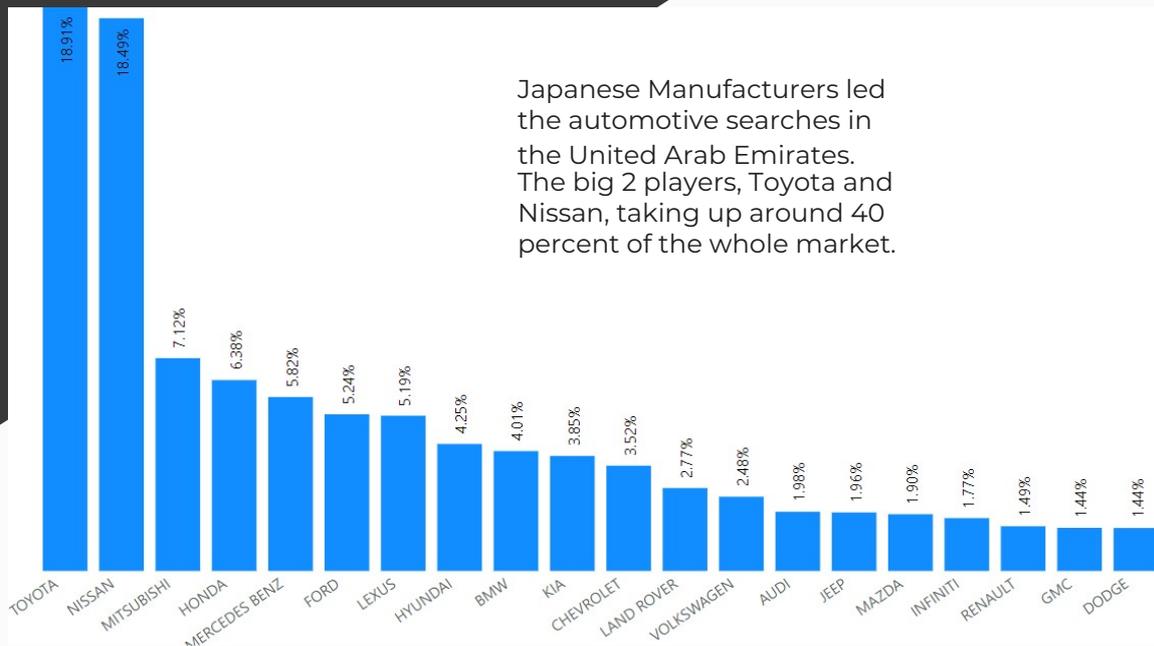

eData Statistics

Our passion for excellence inspired us in the beginning and continues to drive us today.

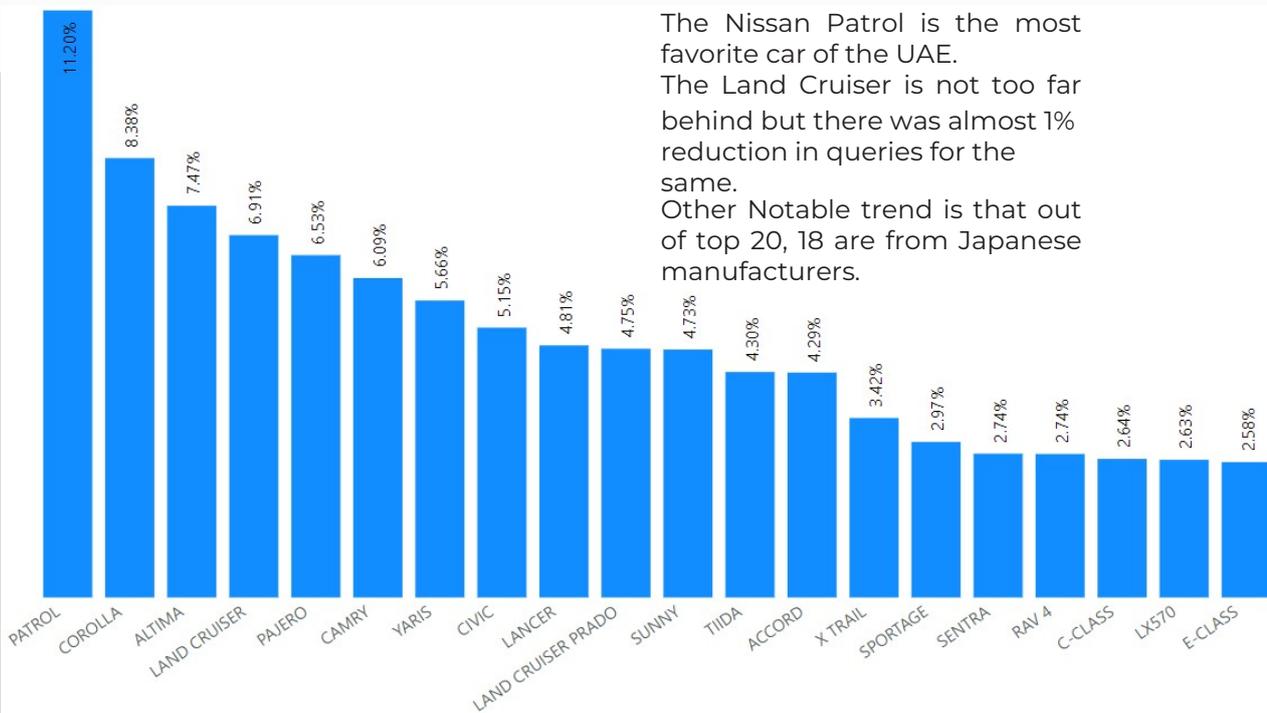

We pride ourselves on offering a superior valuation tools and establish long-term relationships with our customers, like we do successfully for many years.

Benefits for YOU!

-
1. Insurance Co. will know their position within the market share.

 4. GCC / Non GCC of share in market along with claim history will give insurance company indication how it can react or plan for future schemes/ strategy for GCC/ Non GCC vehicles on their own share of business interests.
-

MARKET SHARE BY MAKES

MARKET SHARE BY MODELS

HIGHEST VALUED

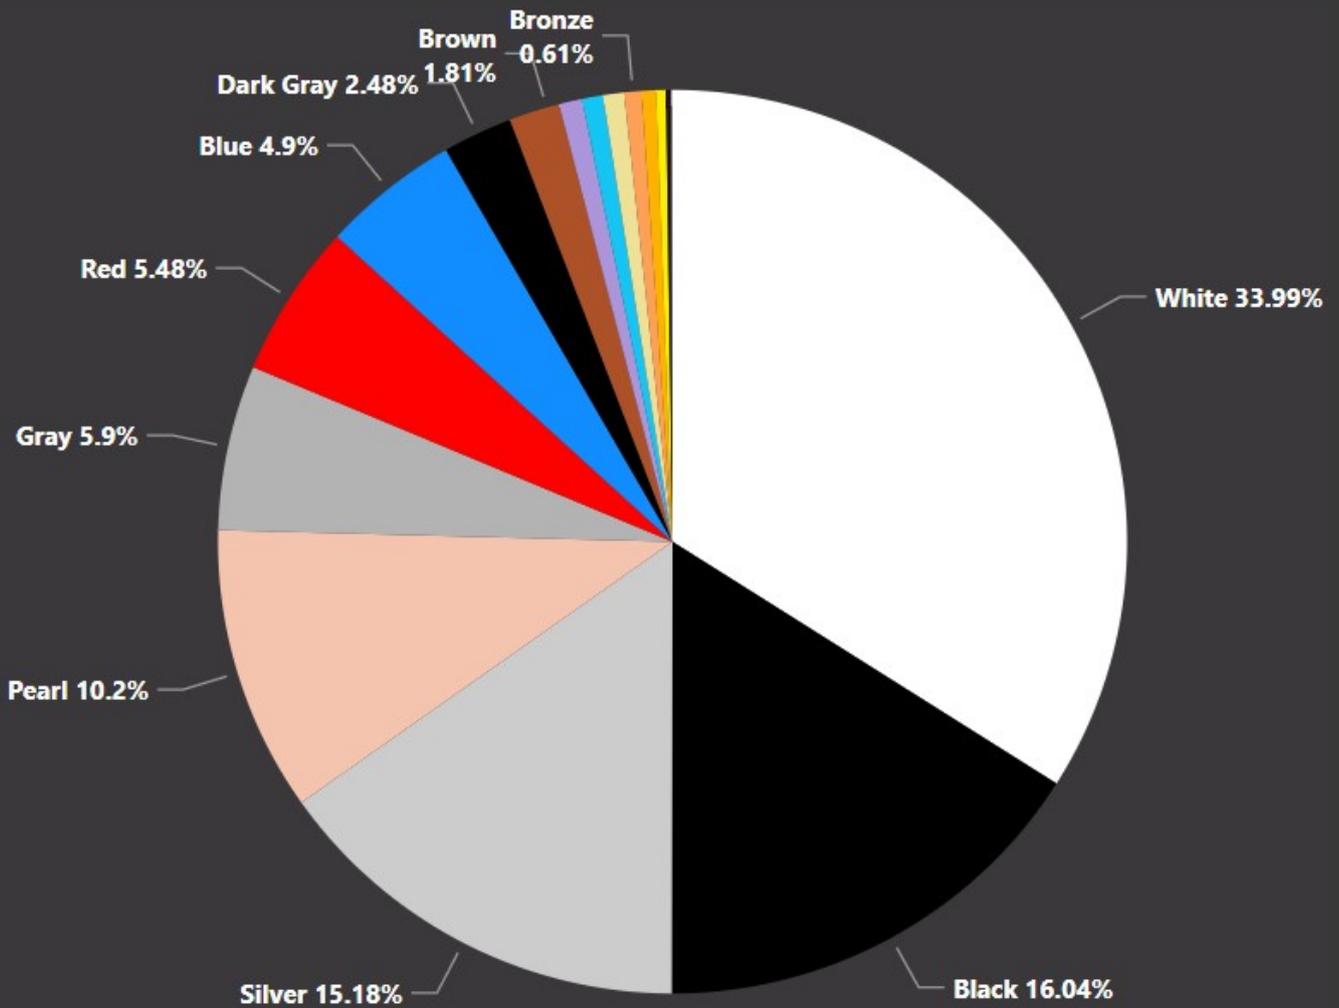

BUGATTI CHIRON was the most Valued car in April,
Valued at
AED 10,702,680

MOST POPULAR

NISSAN PATROL is undoubtedly the MOST favourite car in the UAE with almost **12%** market share.

MARKET SHARE BY COLOURS

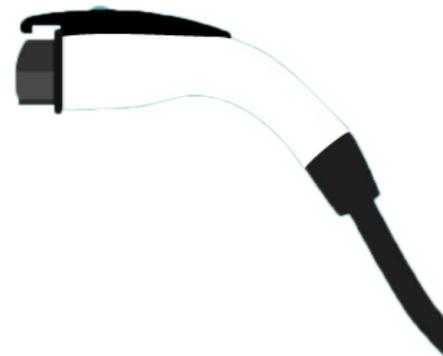

Grayscale colors (white, black, gray, and silver) represent a total of 71.04% of all vehicles on the road in the United Arab Emirates. White sits atop the list as the most popular choice with a share of 34.96%. Followed by Black with 15.44%

MARKET SHARE BY FUELTYPE

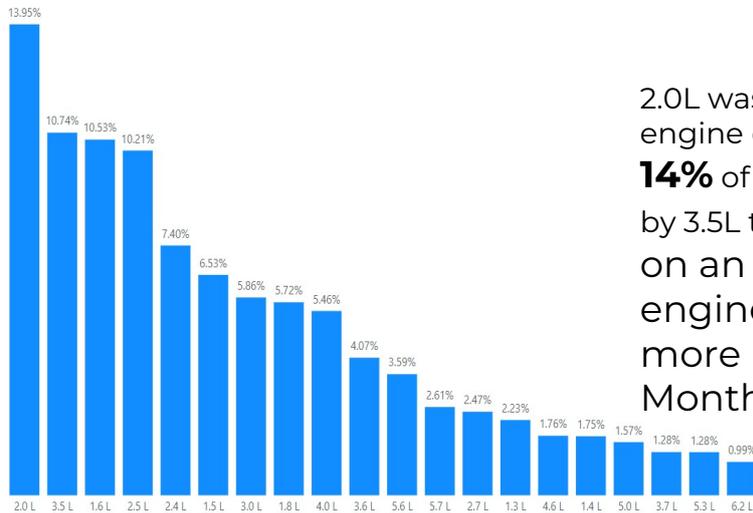

Overall in 2021 2022 MAR, **Petrol** engine vehicles accounted for **95.6%** of all searched vehicles across the UAE. **Diesel** Engines took a share of **2.8%**

Even though Having less market share than conventional fuel, Electric and Hybrid Vehicles are gradually gaining their position in market. As of APRIL **EV** has **1.45%** and **Hybrids** have **0.0.1%** share in UAE market

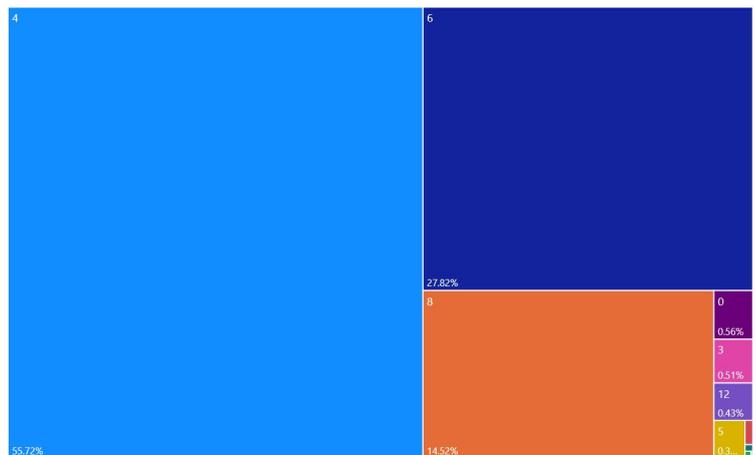

ENGINE STATS

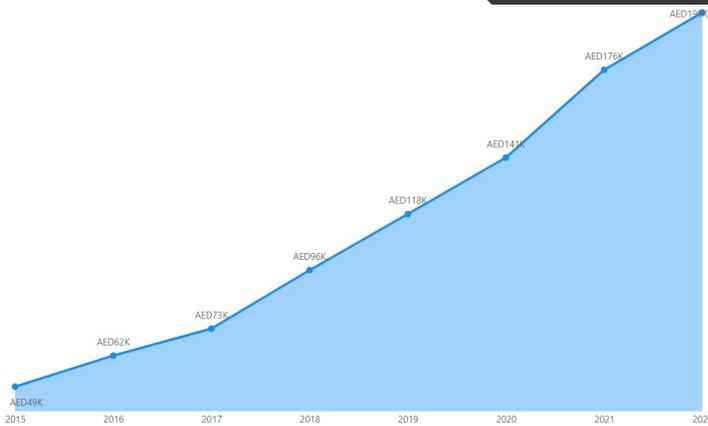

2.0L was still the most popular engine capacity in May taking up **14%** of market closely followed by 3.5L taking up more than **10%** on an average the smaller engine sizes have gained more market share this Month

4,6 and 8 were the most common cylinder configuration for vehicles in UAE for APRIL 4 Cylinder cars taking up more than **55%** of market share

MODEL YEAR ANALYSIS

VALUE BY MODEL YEAR

The year of purchase is an essential factor to be considered in the car valuation process. If a car is older than 10 years, it will significantly impact the price of the car. As Expected, the Valuation of the latest Models were significantly higher at an average than of cars from as old as 5 years ago.

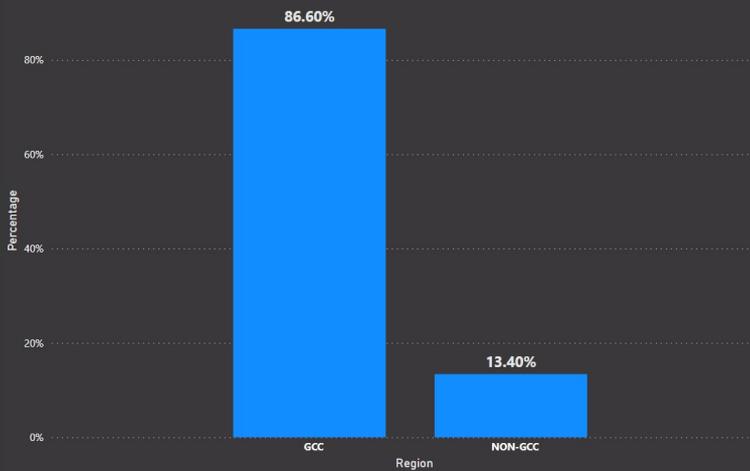

It goes without saying that the number of kilometers driven is inversely proportional to the value of a car. In other words, the higher the number of kilometres in your car's odometer, the lower its valuation. It is obvious and also understood from the analysis that older cars have bigger numbers on their odometers

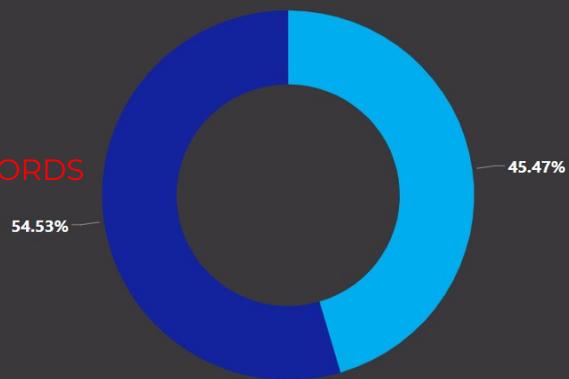

MILEAGE BY MODEL YEAR

VEHICLE IMPORT ANALYSIS

13.4% of all cars were Non-GCC Spec

***HAVE ACCIDENT RECORDS**

ACCIDENT STATS OF IMPORTED CARS

Compared to April, May reported More than **55%** of all NON GCC SPEC Cars Imported to the UAE had Prior Accident History. With our Data and VIN search Capability, YOUR Insurance Company can get full AND Detailed reports about each vehicle, Imported/ GCC/NON GCC

AVERAGES OF MAY

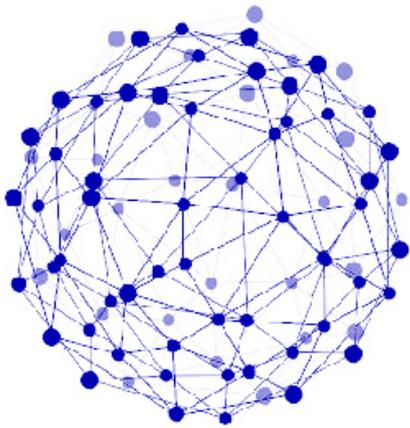

AVERAGE MILEAGE : **146600 Kilo Meters**

AVERAGE PRICE: **AED 70400**

AVERAGE MODEL YEAR: **2012**
